Trade-marks Journal

Vol. 63 No. 3239

General Information

The *Trade-marks Journal* is published every week in compliance with Rule 15 of the *Trade-marks Regulations*. The Registrar of Trade-marks cannot guarantee the accuracy of this publication, nor assume any responsibility for errors or omissions or the consequence of these. All mail relating to trademarks should be addressed to the Registrar of Trade-marks, 50 Victoria Street, Gatineau, Quebec, Canada, K1A 0C9.

Electronic *Trade-marks Journal*

The *Trade-marks Journal* is available in electronic form on the CIPO web site (http://cipo.gc.ca). The *Journal* is available in PDF format and can be downloaded free of charge, viewed and printed with Adobe Acrobat Reader. The electronic form of the *Trade-marks Journal* is the official version.

The *Journal* is also available in a printable HTML format as an alternate official version, and contains a search function to narrow and customize the *Journal* content to user defined areas of interest.

Official Languages

The *Journal* is available in English and in French. The application details are displayed based on the language of the application. If the language of the application is English, the goods, services, or other text and description appearing in the English version of the Journal are in the language filed by the applicant. If the language of the application is French, the goods, services, or other text and description appearing in the English version of the Journal have been translated. Any registration resulting from the application will be restricted to these goods or services described therein.

Filing Dates

The filing date of each trademark application advertised in the *Trade-marks Journal*, including those to extend the statement of goods or services of an existing registration, is shown next to the application number in the sequence of Year, Month and Day.

Nice Classification

The *Journal* includes reference to the Nice classification when the goods or services of an application have been grouped and classed by the applicant in accordance with the current version and edition of the Nice Classification.

Opposition

Any person who has a valid ground of opposition (see section 38 of the *Trade-marks Act* for the grounds of opposition) to any application for registration of a trademark or to any application for registration of a trademark extending the statement of goods or services advertised in this *Trade-marks Journal* may file a statement of opposition with the Registrar of Trade-marks within two months from the date of issue of this publication. The prescribed fee must accompany the statement of opposition.

Certification Mark Text
The use of the certification mark is intended to indicate that the services in association with which it is used are performed by members of an organization that have developed the required expertise to become a Co-Active Coach through participation in a program including hands-on coaching, ongoing group work and one-on-one supervision of actual coaching sessions. The Applicant's Co-Active Coach Training Program integrates foundational principles covered in five core courses namely Fundamentals, Fulfillment, Balance, Process and Synergy that help the coaching client enhance both the quality and results they experience in life and work. The five in-person experiential workshops are followed by a six month virtual Certification Program and includes hands-on coaching, ongoing group work and one-on-one supervision of actual coaching sessions. After successful completion of the program, students are eligible to take the written and oral certification exam administered by the applicant, with the goal of becoming a Certified Professional Co-Active Coach (CPCC). A copy of the Certification In-Course Requirements is placed on file.

GOODS

(a) Machines, namely, industrial purifying units for removing contaminants from water; machine tools for purifying machines for removing contaminants from water; water purifying machines for laboratory grade ultrapure water and for pharmaceutical manufacturing purposes; filters, filter cartridges, filter housings, and parts therefor for use for filtering contamination particles from water in the pharmaceutical and biotechnology field; tangential flow filter units for preparation of biological samples for use in the pharmaceutical and biotechnology industries; disposable filtration devices, namely, filters and purifiers for purification of biological fluid and chemical samples, for use in research and clinical laboratories; mixers for liquids and for liquids and solids, namely, mixers for use in media preparation, buffer preparation, cell culture, fermentation, harvesting, purification, filtration, chronomatography, centrifugation, aseptic filling, formulation; disposable manufacturing components and assemblies for the biopharmaceutical industry, namely, filling machines for filling bottles, vials and syringes, disposable industrial bioreactors for growing cells, and single use disposable non-metal connectors for use in forming sterile connections with the filling machines; glass vials for pharmaceuticals, laboratory supplies, namely glass vials and injection syringes, syringes for medical purposes and for injections and single use disposable non-metal connectors for use in forming sterile connections with the filling machines used in the pharmaceutical industry; power-operated hand-held crimping tool for sealing and cutting tubing; liquid, namely, biological fluid and water filtrating and solute concentrating unit for laboratory and industrial use; parts and fittings for all the aforesaid goods; (b) scientific instruments for testing in the field, namely, photometers, reflectometers and turbidimeters; analysers and analysis apparatus, namely, temperature sensors, oxygen sensors, pH sensors; filtration housings, filter bags, filter cartridges and filter elements for use in industrial liquid and gas filtration; automatic ion-exchange chromatography apparatus for laboratory use, ion-exchange resin membranes in the form of chemical preparations, ion-exchange resins in the form of chemical preparations; chromatography apparatus for laboratory use; publications in electronic format or on cd-roms, namely, electronic pharmaceutical and chemical publications and pre-recorded cd-roms containing pharmaceutical publications; computer software for management of lab water machines; pressure sensors; laboratory filters, namely, ultrafiltration filter for water; kits for the expression, amplification, purification and analysis of biological samples, said kits comprised of at least one of the following: proteins, nucleic acids, gels, namely, tissue culture medium and reagents for research and laboratory use, probes, buffers, stains and associated reagents and tubes, vials, multiwell plates, and petri dishes for carrying out said purposes; sterility testing devices, namely, electronic testing device, namely, CCD Cameras, chemiluminescent detectors, fluorescence detectors for testing the sterility of filtration equipment; mixed ester and thermoplastic cellulose ultrafiltration membranes for laboratory use; fluorescence, electrochemiluminescence and bioluminescence system comprised of filters, namely, microporus membranes, fluorescent indicator panel displays, and photo-optic readers for detecting contamination in biological fluid and water; apparatus for performing chromatographic separations and parts thereof for industrial and laboratory use, namely, gas and liquid chromatography columns, cartridges, silica gel plates, fraction collectors, mixers, monitors, pumps, recorders and analysis software; purification units for laboratory use, for removing contaminants from water and biological liquids; adsorptive separation devices, namely, filters having one or more chemical or charged entities for the absorption of impurities; computer software for management of biopharmaceutical purification processes; test units for determining the integrity and pore-size distribution of membrane filters; analysers and analysis apparatus, namely, temperature sensors, oxygen sensors, pH sensors; electrodes for laboratory research, namely, pH electrodes; multiple well membrane filter for laboratory and research use for removing contaminants from water and biological liquids; membranes and equipment used in dialysis, namely, membrane holders and pumps used in dialysis, reverse osmosis and ultrafiltration and like processes, and parts thereof; bioreactors for culturing of cells; parts and fittings for all the aforesaid goods; (c) filters for use in laboratories, namely, disposable centrifugal filters for use in medical and research laboratories; (d) apparatus for lighting, heating, drying, ventilating, water supply and sanitary purposes, namely, laboratory lamps, lighting fixtures, and water filtering units for industrial use; filter units for laboratory use for removing contaminants from water and biological liquids; purification units for industrial use for removing contaminants from water; filtration membranes for laboratory use for removing contaminants from water and biological liquids; tangential flow fluid filtration system comprised of a tangential flow filtration membrane cassette holder, scale, feed pump and piping and valves therefor, for purification of water and biological liquids; liquid treatment equipment, namely, sterilizing grade filter cartridge unit for use in the pharmaceutical, biopharmaceutical, and food and beverage industries; water conditioning units; parts and fittings for all the aforesaid goods; purification units for removing contaminants from water and biological liquids; membrane filter cartridges for the separation of biomolecules for laboratory and research use in the field of biopharmaceutical production; GOODS

common metals and their alloys, namely, cast iron, steel, copper ingots, aluminum ingots, iron alloys, steel alloys, copper alloys and aluminum alloys; metal building materials, namely, structural steels, sheet piling, structural beams and pipes made of metal, non-electric lifting cables; non electric guy wires, pipes and tubes of metal for conveying gases, liquids and solids; machines for the treatment, processing and production of metals and plastics, namely, milling machines and grinding machines, and machines utilizing rotational motion for high energy surface finishing and material treatment, namely, heavy, medium and light section rolling mills, cold and hot mills, strip and wide strip mills, plate and sheet mills, blooming, slabbing and billet mills, universal mills, planetary mills, multi-purpose cold mills, rod, bar and tube mills, continuous mills, reversing mills, pilgrim mills, detaching mills and mills for the rolling of steel, iron, aluminum and copper or for the rolling of alloys of the same, and replacement parts for the aforementioned rolling mills; rolling mills for wire, steel rod rolling mills, bloom rolling mills, rail rolling mills, and section rolling mills, drawing machines, wire ring presses, reeling machines; machines for manufacturing, processing and working seamless and welded pipes, namely, pipe expanding machines, large pipe manufacturing machines, hot and cold pipe rolling mills, presses, namely, extrusion presses, impact extrusion, cold extrusion and back-flow extrusion presses, cable sheathing presses, straightening and bending presses, plate shaping presses, deep-drawing presses, multi-stage presses, hydraulic metal powder presses, and replacement parts therefor; forging machines, namely, open-die forging machines, automatic forging hammers, forging presses, piercing presses and counter blow hammers, and replacement parts for the aforementioned forging machines; casting machines, namely, continuous steel slab casting machines and machines for the continuous casting of metals, plastic extrusion and plastic molding machines, and replacement parts for the aforementioned casting machines; electric power generators for rolling, pressing, forging and casting installations; hydraulic driving machines for rolling, pressing, forging and casting installations; supporting chain conveyors and hoists, roller tables, tilters, scale washers, and roller cleaning machines; conveyors for the conveying of rolled, pressed, forged and cast articles to and from rolling, pressing, forging and casting installations; welding machines, namely, pipe welding machines, butt-welding machines, cutting machines, namely, pipe blades, flame cutting machines; machines for filling and emptying blast furnaces; machines for tilting, pivoting, and moving converters and ladles used for casting installations; machines for the chemical industry, namely, chemical fiber drying machines, extracting machines for chemical processing; machines for agriculture, namely, combines, harvesters, threshers, and tillers; machines for mining, namely, excavators, cutters, earth and burden movers, loaders, cutters and conveyors; mining shafts, hoists, skips, windlasses; inclined conveyors, winding engines, winding towers, head frames, conveyor buckets, conveyor belts, mine car fillers and unloading machines; hydraulic and pneumatic conveyors; pipeline conveyors; waste disposal comminuters, conveyors, loaders for loading containers with radioactive waste, transporters for radioactive waste containers; metal coil handlers, metal coil winders, metal coil conveyors, metal coil packagers, metal coil stackers; cranes, hoists and clamps being parts thereof ; machine tools for the steel mill industry, namely, grinding machines; rolling mill roll replacement machines; motors and engines (except for land vehicles), namely, electric motors for machines, electric gear motors for machines; machine coupling and transmission components, namely, hydraulic and mechanical transmissions for machinery and replacement parts therefor; weighing, measuring, signaling, and checking apparatus and instruments for conducting, switching, transforming, accumulating, regulating or controlling electricity, namely, electric luminescent display panels, light emitting diode displays, liquid crystal displays, strip tension dynamometers, strip tensioning laboratory blades, strip flatness meters, thermometers, speedometers, pressure gauges, angle gauges, distance meters, roughness gauges, electric and electronic control devices for steel mills, namely, flatness sensors, roughness sensors, pressure sensors and tensioning sensors for influencing the properties of rolled steel; control panels for rolling mills, electrical and magnetic detectors for monitoring the properties of rolled steel; frequency meters; apparatus for recording, transmission or reproduction of sound or images, namely, video transmitters; calculators, and computers for use in operating and controlling operations of metallurgical plants and rolling mills; data carriers, namely CD's, DVD's and USB sticks containing software for regulating or controlling rolling, pressing, forging and casting installations; computers featuring programs for controlling rolling mills, furnace plants, continuous casting machines; computer programs for controlling and regulating machines for the metallurgical industry, machines for the steel industry, continuous casting machines, rolling machines, forging machines, pressing machines and machines for processing synthetic materials, and machine tools stored on data carriers; apparatus for heating, steam generating, cooking, refrigerating, drying, ventilating, and water supply purposes, namely, furnaces for metallurgical plants, steel mills, continuous casting plants, forging and pressing plants;

cooling systems comprised of industrial water recirculation cooling and heating systems for rolling, pressing, forging and casting installations comprising heat insulation, water roll coolers, strip preheaters, spray water cooling sections sprayers, furnaces, cooling towers, cooling fans, scarfing and flame cutting, slab cooling wheels for pressing, forging and casting installations; coolant purifiers, water neutralization plants, water separators, washing brushing machines and filters for rolling, pressing, forging and casting installations for machines for the metallurgical industry, machines for the steel mill industry, namely, continuous casting machines, rolling machines for the rolling of metals, forging machines, namely, pressing machines for metals; apparatus for heating, namely, electric heaters for rolling, pressing, forging, and casting installations, heat sinks, electric heating panels for rolling, pressing, forging, and casting installations; heaters and furnaces for rolling stock, namely, metal products subject to rolling in a rolling mill and for continuous casting plants; steam generators; refrigerated merchandise display cases, cooling apparatuses for rolling stock, rolling mills and continuous casting machines, namely, water sprayers, air coolers; drying, ventilating fans and louvers and cooling water circuit installations; air coolers for metallurgical plants, steel mills, continuous casting plants, rolling mills, and forging and pressing plants; smelters ; filters for rolling, pressing, forging, and casting installations; non-metallic building materials, namely, foundation plates, non-metallic water and lubricant pipes for building purposes

SERVICES
